

## Siegenia AEROMAT mini

### Product information

Window rebate ventilator with optional turn lock.

As an energy-saving passive ventilator, the AEROMAT mini offers big benefits for the smallest room: its fresh air supply with flow control ensures a comfortable living environment. The AEROMAT mini can be easily installed in timber, uPVC and aluminium windows so that it is almost invisible.

### AEROMAT mini product features:

- Controlled, steady fresh air supply with closed windows
- Passive ventilation
- Mould prevention and humidity control in accordance with DIN 1946-6
- Concealed in window rebate and easy to upgrade
- Self-regulating volumetric flow limiter stops draughts

### Installation features:

- Fast and easy integration into production processes
- Narrow design for flexible installation and very small sash sizes
- Horizontal installation at the top and on the hinge side with standard screws

## Siegenia AEROMAT mini HY

### Product information

Window ventilator with humidity control.

AEROMAT midi HY passive window ventilator ensures demand-based minimum ventilation with minimal effort and controls ventilation based on the humidity. The compact window ventilator's air supply is achieved by equalising pressure between the indoor and outdoor air (pressure differential principle).

### AEROMAT midi HY product features:

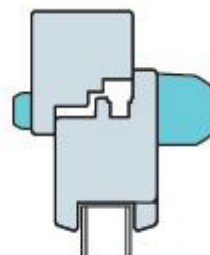

- Passive window ventilator with humidity control for demand-based minimum ventilation
- Air intake regulation based on the relative humidity as per DIN 1946-6
- Modern and discreet look due to its rounded shape and narrow weather grille
- Optional version with sound insulation module for sound insulation up to 42 dB
- Optionally available in the special colours grey, brown and black
- Easy to clean ventilator

### Installation features:

- Easy integration into production processes
- For horizontal installation in timber, uPVC or aluminium windows
- Suitable for renovations and new build

AEROMAT midi HY 42 dB, with additional sound insulation module
